

FD SHINE 360 AUDIT

The FD Shine 360 Audit is a comprehensive evaluation designed to ensure operational excellence in facility management, cleanliness, and compliance with SHINE standards. Its rationale stems from the need to proactively identify areas for improvement, mitigate risks, and foster a culture of accountability and continuous enhancement. This audit is critically important as it directly impacts safety, efficiency, and overall performance, ultimately safeguarding our team's well-being and organizational integrity.

Comments

Frank's detail Minneapolis was clean and free trash. Employees took care of assumed work station,, but need improvement on cleaning up every 5-7 cars. Card had all assigned work materials but had some thing underneath that did not belong. Employees had safety glasses but not all wearing over eyes.

Corrective Action Instructions

For any area graded as 'Needs Improvement' or 'Unsatisfactory', a detailed Corrective Action Plan (CAP) must be submitted to the Shine Standards Director (SSD) within 7 business days of this audit's issuance. The CAP should outline specific steps, responsible parties, timelines, and verification methods to address the deficiencies. Please CC your direct supervisor on the submission to ensure alignment and accountability. Failure to comply may result in escalated reviews or further interventions to maintain SHINE standards.
